PROFILE

I'm a Web developer with a focus on JavaScript. I would only be interested in remote work. If possible, would like to work with ReactJS, React Native and Typescript or remote database service like Firebase. I love writing clean code and would like to improve my skills in writing automated tests (jest, jasmine, Cypress). Besides programming I also have a knowledge about SEO, security, and writing technical content

EDUCATION

[2018-2020]

[INTERMEDIATE], [STEPPING STONE INTER COLLEGE GORAKHPUR]

I was participating and organized several programs for my college. And gained more experience in my life

[2021-2025]

[BACHELOR OF TECHNOLOGY], [AXIS INSTITUTE OF TECHNOLOGY AND MANAGEMENT KANPUR]

Currently I am a student of my highly reputed college which is exploring and learning technologies.

SKILLS

Programming languages:

- [JavaScript, C++, Java]
- [HTML, CSS, JS]
- [NODEJS, EXPRESS, MONGODB, REACT]
- [MYSQL]
- [GIT, GITHUB, VSCODE]

TOOLS

OPEN-SOURCE PROJECTS

1.Recipe finder website:

Description :

Developed a dynamic and interactive recipe website using **HTML**, **CSS**, **JavaScript**, and **third-party APIs**. The website features a search functionality that allows users to search for recipes and retrieve detailed information about ingredients and preparation steps.

Key Features:

- **Search Functionality:** Users can search for recipes by keyword.
- **API Integration:** Implemented APIs to fetch real-time recipe data from external sources.
- **Responsive Design:** Ensured compatibility across various devices using CSS.
- **Interactive UI:** Built a user-friendly interface for seamless navigation and browsing.

Technologies Used:

HTML, CSS, JavaScript, APIs

2.Portfolio

Creating my own portfolio, you can go through on my GitHub or Netlify where it's deployed

3.Moviemania

It is website that gives the trending movies. it's a fully deployed front-end and back-end, it took the components for Front end HTML, CSS, JS and REACT and Backends usages MongoDB, Api, npm, Express, Node.js, EJS. This project covers API fetching parts and more frontend, backend but it is still a work in progress.

COURSES AND TRAINING

1. Full-Stack Development

Recently I finished my full-stack development training with a mentor. whose enthusiasm helped me gain a good command of my project

2. DATA ANALYST

I have done the Data Analyst with Power BI that helped create dashboards on the observation of distinct data from various sectors.

INTERESTS AND HOBBIES -programming, mathematics, photography
